

# Tea as a Sustainable Landscape

Dr Ellie Biggs

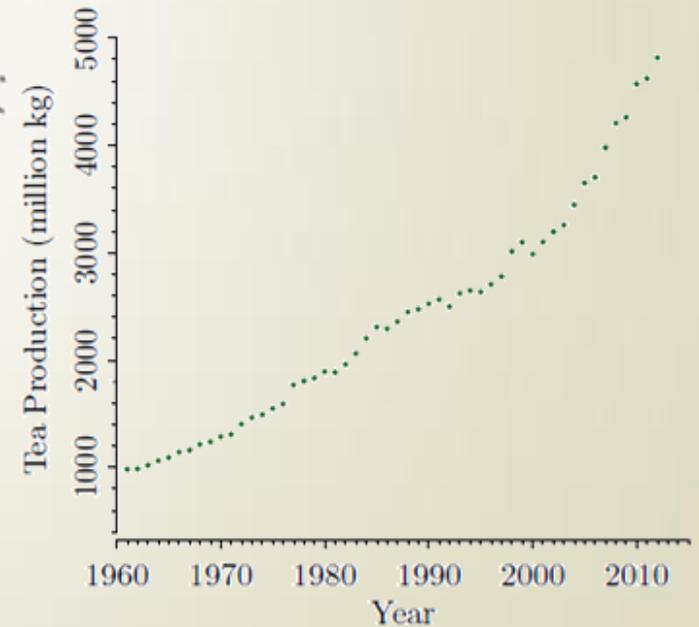

University of Southampton

 @EllieMBiggs

# International Tea Production

Data source: FAO, 2012 (map produced by J Willbourn)

# Tea Export Value

- ▶ Tea retail industry worth ~\$40 billion
- ▶ India produces a quarter of all global tea production
- ▶ Assam is single-largest tea growing region in the world
  - ▶ 52% of India's tea production
  - ▶ 12% of annual global tea yield
- ▶ UK is largest tea consumer in Western Europe
- ▶ The UK imports around £250 million worth of tea each year

# Threats to Tea

- ▶ “Life without tea is unthinkable for the billions of people who rely on their cherished cuppas to get them through the day.”
- ▶ “Tea crops the world over are facing multiple threats, from **climate change and water shortages to rural de-population and low wages.**”
- ▶ “So serious are these threats, that some of the world's biggest tea companies are joining forces to combat them.”

<http://www.bbc.co.uk/news/business-26123944>

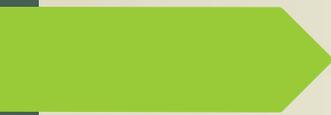

The image is a screenshot of a BBC News article. At the top, the BBC logo is visible on the left, and navigation links for 'Sign in', 'News', 'Sport', 'Weather', 'iPlayer', and 'TV' are on the right. Below this, the main header reads 'NEWS BUSINESS'. A secondary navigation bar includes 'Home', 'World', 'UK', 'England', 'N. Ireland', 'Scotland', 'Wales', 'Business', 'Politics', 'Health', 'Education', and 'Sci/Env'. Further down, there are links for 'Market Data', 'Your Money', 'Economy', and 'Companies'. The article's date is '14 February 2014' and it was last updated at '00:19'. The title of the article is 'Tea industry's future depends on corporate collaboration', written by 'Richard Anderson', a 'Business reporter, BBC News'. The main image shows a woman in a yellow and red shirt harvesting tea leaves in a plantation. Below the image is a caption: 'Tea plantations are under threat from climate change and competition for land'. The article text begins with a quote: 'Life without tea is unthinkable for the billions of people who rely on their cherished cuppas to get them through the day.' It then states that tea crops worldwide face threats from climate change, water shortages, rural de-population, and low wages. It notes that major tea companies like Unilever, Tata Global Beverages, and others are collaborating to protect the industry's future. A quote from Sally Uren, chief executive of Forum for the Future, is also included. On the right side of the article, there is a 'Related Stories' section with a link to 'Where does Britain's tea come from?' and another link to 'Nations join to form 'tea cartel''.

# Tea as a Hero Crop

- ▶ “Tea2030... [identifies] a real opportunity for tea to become a ‘hero’ crop. A hero crop delivers more than just a commodity. It also delivers major benefits to the millions of people involved in the tea sector, the planet and the wider economy.”
- ▶ 29 big challenges to future sustainability of tea landscapes
- ▶ Multi-institutional response required

# Tea Value Chain

- Need to address sustainability issues throughout entire **value** chain
- Stronger integration and synergy between policy, R&D and tea communities is required

# Sustainability

	Estate and factory workers	Small-scale farmers
Social Issues	<ul style="list-style-type: none"><li>- High discrimination, gender inequality</li><li>- Low representation of workers</li><li>- Poor living conditions on estates</li></ul>	<ul style="list-style-type: none"><li>- High reliance on tea for livelihood</li><li>- Low level of farmer organization</li><li>- Lack of land title deeds</li></ul>
Economical Issues	<ul style="list-style-type: none"><li>- Low wages</li><li>- High level of casual/temporary labor</li><li>- Uneven value distribution</li></ul>	<ul style="list-style-type: none"><li>- Lack of market information, market access &amp; (technical) training</li><li>- Low productivity and low prices versus high production costs</li><li>- Uneven value distribution</li></ul>
Environmental Issues	<p>Small-scale farmers and estate and factory workers</p> <ul style="list-style-type: none"><li>- Deforestation / loss of biodiversity due to conversion of forests into tea farms</li><li>- Soil erosion, low soil fertility</li><li>- Agrochemical use</li><li>- Pollution and energy inefficiency in processing tea</li></ul>	

# Sustainable Landscapes - Assam

- ▶ Primary issues as identified by Tea2030 consortium

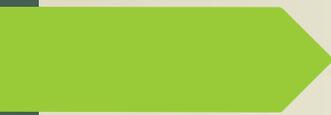

Region	Current Challenges	Ongoing Solutions	Opportunities
Assam, India	<ul style="list-style-type: none"><li>• Political stability, poverty and governance</li><li>• Environmental degradation, wildlife conflict and climate challenges</li><li>• Land competition</li><li>• Reduction in labour force and tea worker quality of life (social/health issues)</li></ul>	<ul style="list-style-type: none"><li>• Social and environmental initiatives to improve quality of life</li><li>• Advocate reduction in pesticide use and value of acquiring tea certification</li></ul>	<ul style="list-style-type: none"><li>• Developing adequate infrastructure</li><li>• Increase environmental awareness</li><li>• Industry-researcher collaborations (R&amp;D and advice to producers)</li><li>• Symbiosis of wildlife-tea landscape</li></ul>

# Climate-Smart Landscapes

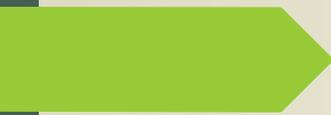

- ▶ Climate-smart agriculture aims to (sustainably):
  - ▶ Increase productivity and income
  - ▶ Enhance agro-ecosystem resilience to climatic change
  - ▶ Mitigate agriculture's contribution to climate change
- ▶ Climate-smartening Assam's tea plantation landscapes will deliver multiple benefits to **livelihoods** and the **environment** whilst developing **resilience** to uncertain and negative climate change impacts
- ▶ Tea production needs to be adaptive and focus on moving agricultural system operations towards '**safe spaces**'
  - ▶ Where livelihoods are sustained without crossing critical environmental or social limits and the system is resilient to climatic changes

# Contributions to Sustainable Landscape Management

- ▶ Provide research to ascertain and quantify the value of tea within landscape of Assam
  - ▶ Evidence to aid sustainability initiatives throughout the value chain
- ▶ Focus on climate impacts, adaptation and mitigation for future landscapes
- ▶ Provide evidence-based decision making to ensure future viability and productivity of tea in Assam (under climate change)
  - ▶ Develop spatial decision support tools
- ▶ Contribute to research component of the value chain with full stakeholder collaboration to ensure successful landscape management practices are promoted and adopted in Assam
